

Abstract of the Disclosure

The invention relates to a method for transferring data from a source communication device to a destination communication device. To allow automatic transfer of data between the
5 devices, it is proposed to establish a data connection between the source communication device and the destination communication device, transfer a data collector means from the destination communication device to the source communication device, collect data to be transferred from
10 the source communication device to the destination communication device using the data collector means, and to transfer the collected data from the source communication device to the destination communication device using the data collector means.
